to service portable fire extinguishers
and hose equipment.

BUSINESS SUMMARY

Laramie Fire Extinguisher Services, LLC is a fire and life safety company that sells, installs, inspects and services fire extinguishers and pre-engineered fire suppression systems for kitchen hoods and industrial applications. It is our policy to not offer any service unless we are trained, certified or licensed (if required) and insured.

CAPABILITIES

We are an authorized distributor for Amerex brand extinguishers and Intelgard MACAW back pack systems. However, we inspect and service all brands of fire extinguishers including:

- All dry chemical (ABC, BC, BC-PK, and D)
- Clean agent (Halon 1211 and Halotron 1)
- Water and wet chemical (AFFF, FFFP, Class K)

We are also an authorized distributor for Amerex brand pre-engineered kitchen hood and industrial systems. We also inspect and service all brands of pre-engineered kitchen hood systems and most pre-engineered industrial systems.

“Hands-on” extinguisher training is another important service we provide. We couple an on-line, interactive course with a “hands-on” experience that allows each trainee to actually pull a pin and put out a fire.

FACILITIES AND EQUIPMENT

Our shop, built in 2012, was certified in 2013 by the U.S. DOT as a cylinder hydro-testing facility. We use Getz/Amerex brand hydro-testing equipment that is calibrated annually.

Our servicing and refilling is done using state of the art Getz/Amerex dust containment equipment.

We also have a Getz/Amerex built mobile service vehicle that allows us to have a “shop on wheels” to provide service as needed on site.

CUSTOMERS

- FE Warren Air Force Base (Extinguishers and Kitchen Hood Systems)
- Wyotech (Extinguishers and Pre-Engineered Industrial Systems)
- Mountain Cement (Extinguishers and Training)
- Iverson Memorial Hospital (Extinguishers)
